### Safety and emergency evacuation procedures

In the unlikely event of a fire, SECC has a comprehensive fire detection system which is complemented by sprinkler protection. In the Exhibition Halls fire hose reels are installed at various locations below prominent signs. Alarm points are located at or near fire exits and vehicle doors. The automatic alarm is activated if the smoke or heat detectors come into operation or if any fire hose reels are used. The fire alarm takes the form of a pre-recorded announcement over the Public Address System, the text of this message is:

*“Attention please, Attention please. An emergency situation has arisen within the centre. Please leave the building by the nearest available exit, do not use the lifts”.*

**If you discover a fire:**

1. Break the glass on the nearest manual call point.
2. Telephone the Security Control (extension 444), giving the location of the fire, or inform a member of SECC staff in the Hall.
3. Advise other persons in the vicinity of the emergency.
4. Do not attempt to extinguish the fire unless it is safe to do so and you are competent to use a fire extinguisher.
5. As soon as the instruction to evacuate the Centre is broadcast, you must leave the premises by the nearest available exit. Follow the directions from Stewards moving to and remaining at Fire Assembly areas near the East or West entrance.
6. You must not attempt to return to the Centre until the Senior Officer in charge of the fire brigade detachment says that it is safe to do so.

**Fire extinguishers**

Exhibitors using, exhibiting or storing hazardous substances, objects or processes should provide the appropriate extinguishers for their stand.

**Smoking**

In accordance with government legislation smoking is not permitted in any building, temporary enclosed structure or substantially enclosed space outside of buildings.
